

**UBERTI REMINGTON '1858' NEW ARMY BLACK POWDER REVOLVER  
SAFETY MANUAL**

# UBERTI REMINGTON '1858' NEW ARMY BLACK POWDER REVOLVER SAFETY MANUAL

## PRECAUTIONS

**Read and understand all the following precautions before removing this firearm from the package.**

The United States I.R.S., B.A.T.F. and treasury department classifies this product as a firearm or dangerous weapon; therefore, it is potentially lethal.

**WARNING:** Careless and improper handling of this gun could result in unintended discharge causing injury, death or property damage. Safety must be the first and constant consideration when handling a firearm and ammunition.

**CAUTION:** Prior to removing this gun from its packaging, and prior to loading and shooting, carefully and thoroughly read this entire instruction manual which advises on the gun's proper functioning and handling. If you are unsure of anything, or have little experience or are unfamiliar with firearms, contact your local gun club, NRA approved instructor, or directly contact the National Rifle Association, Washington, D.C. 20036. Firearm safety is your responsibility and your safety and that of your family and others depend on your responsible, safe use.

## NOTICE - DISCLAIMER OF LIABILITY

A. Uberti srl shall not be responsible for product malfunction or for physical injury, death, or property damage from the gun's intentional or accidental discharge, its criminal or negligent use, improper or careless handling, unauthorized modifications or alterations, corrosion or other failure to maintain, use of defective, improper, hand-loader or reloaded ammunition, or other than original, good condition, high quality, commercially manufactured ammunition, or from its use for purposes or subjection to treatments for which it was not designed. A. Uberti srl will not honor claims made by the second or subsequent owners of the firearm.

While this firearm was tested, carefully inspected, and packaged before it left the factory, A. Uberti srl cannot thereafter control product handling. Please be sure to examine this firearm carefully when purchased to ensure it is unloaded and undamaged. Your gun dealer will assist you in making this examination and answer any further questions in this regard.

## AMMUNITION

**AMMUNITION WARNING:** Since your gun has been designed for specific caliber ammunition, use only commercially manufactured ammunition which pressure cannot be higher than the ones stated by SAAMI or C.I.P. standards. The factory ammunitions to be used has to be in excellent condition only, of original high quality, and specifically recommended for the gun and nothing else. Never use reloaded or hand-loaded ammunitions. Never carry the gun with a round in the chamber until ready to shoot.

## SAFETY FEATURES

Safety devices, if used properly, can help minimize the danger of accidental firing.

**NOTE:** Read carefully your instruction manual on how to operate the safety devices on your gun. Safety devices on guns are extras and are not a substitute for your proper and safe handling practices.

## SAFETY INSTRUCTIONS

Whether you are an experienced safe shooter familiar with this instruction manual's procedures of have some or no familiarity with handling a gun, it is imperative that you carefully and thoroughly read this entire instruction manual and follow the safety instructions to ensure you are familiar with the proper and safe use of this firearm and to prevent personal injury, death, or property damage.

### CAUTIONS:

- Before shooting, learn this gun's mechanical and handling characteristics, and read and be thoroughly familiar with these safety instructions. If you do not fully understand any of the instructions in this manual, consult a competent firearms instructor through your local gun club or the NRA in Washington or you can write to us at A. Uberti srl.
- Always point the gun in a safe direction, and handle it as though it were loaded. This is especially important when loading and unloading the gun, and when handing it to someone else. Never take someone's word that it is unloaded. Always check it yourself with your fingers off the trigger and the gun pointed in a safe direction.
- Always keep the safety on until you are ready to safely shoot at an intended target (see safety feature above). Note: Safety devices on guns are extras and are not a substitute for your proper and safe handling practices.
- While at a shooting range, always carry the gun unloaded and open until preparing to shoot. Keep it pointing towards the backstop when loading, shooting and unloading.
- Never drink alcoholic beverages or take any drugs before or during shooting, as this not only constitutes criminal disregard for your safety and that of others, but will seriously impair your judgment and vision. Moreover, never use a gun while you are taking medication unless you have checked with your doctor to ensure your fitness to handle the gun safely.
- Always wear and encourage others near you to wear proper ear protection when shooting, especially on a range since the noise from your gun, and other guns close to you, could result in a humming or ringing sound in an exposed ear for some time after firing. Repeated exposure to shooting noise could result in permanent hearing loss.
- Always wear protective shooting glasses to protect your eyes from injury by gun powder, gas, lubricant, dirt or metallic particles, carbon residue, sparks or other debris.
- Always check the barrel bore, chamber and action to ensure they are perfectly clean and clear of obstructions. Clean a fouled gun immediately for correct and safe function.
- Do not smoke while handling, loading or shooting any ammunition, especially black powder. Keep black powder in a closed container at all times, reclosing the container after each and every use.
- Always use only good condition, undamaged, clean, dry, original high quality, commercially manufactured ammunition of a reputable company which is appropriate for the gun's caliber. Ammunition which is too small can fall forward and become a barrel obstruction. Manufacturers design guns and ammunition within exacting engineering safety limits. Since handloads are often outside those limits, they are not to be used.
- Always use an individual charge from a powder measure when loading a muzzleloading gun, never charging directly from a powder flask.
- When selecting a place to shoot, always be absolutely sure of your target and the area behind it before you touch the trigger, making sure there is an adequate backstop which will stop and contain bullets. A bullet can travel through or past your target up to 1/2 miles. If you have any doubt, do not shoot.
- Never shoot at flat or hard surfaces such as a rock, or at water a bullet may ricochet and travel in unpredictable directions to strike you, or an object you cannot see, causing injury, death, or property damage.
- Never shoot the gun near an animal, as the animal could be startled and create an accident.
- Never engage in "horseplay" while holding your gun.
